Drupal のコンセプト

Assembling your website

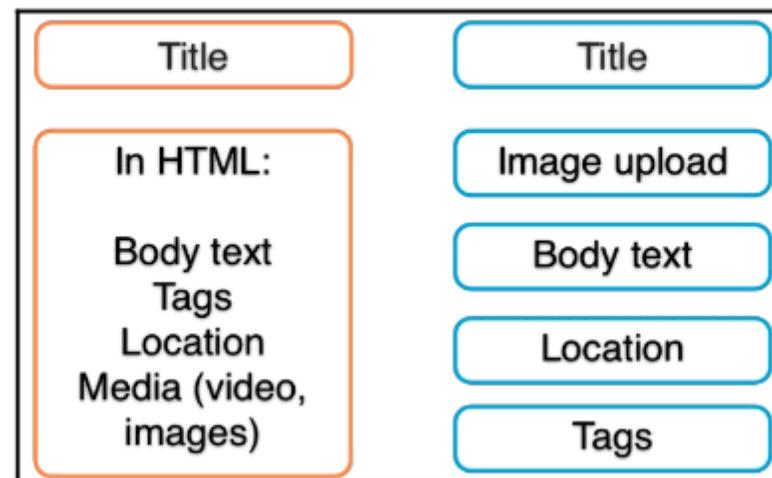

Your mental model might be like this.

- You use Drupal to assemble sites with data.
- Drupal surprises users who expect "structure first". Drupal is "data first".
- The computing metaphor of "folders" and "documents" is compelling. Beware!

Structured data

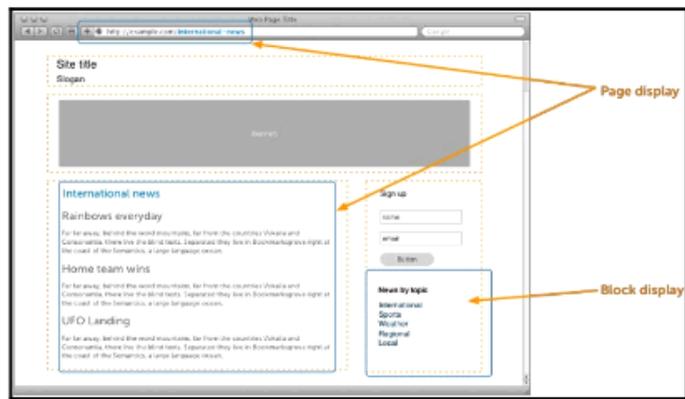

Compare these two data models. How can you control content input and display with either?

Unstructured text on the left, structured data (fields) on the right.

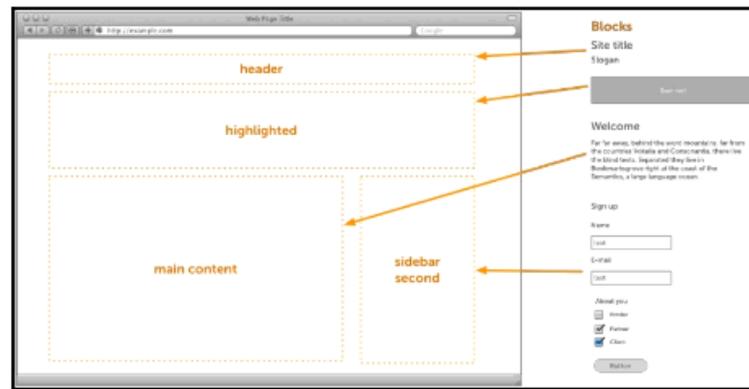

First: Site Building

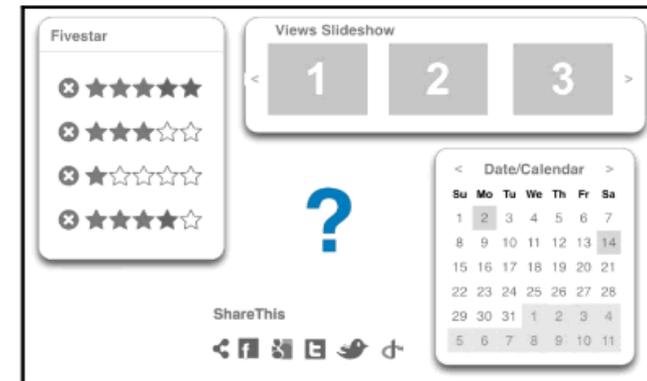

Site building is everything you can do in the UI layer of Drupal

Second: Layout and theming

Layout and theming combines Drupal site building and coding in PHP/HTML/CSS/JS.

Third: Custom coding with modules

Modules answer questions such as "Can Drupal do X?"

Why choose Drupal

1. Compared to other CMSs:

- Highly configurable functionality and UX.
- Extendable with API and custom themes.

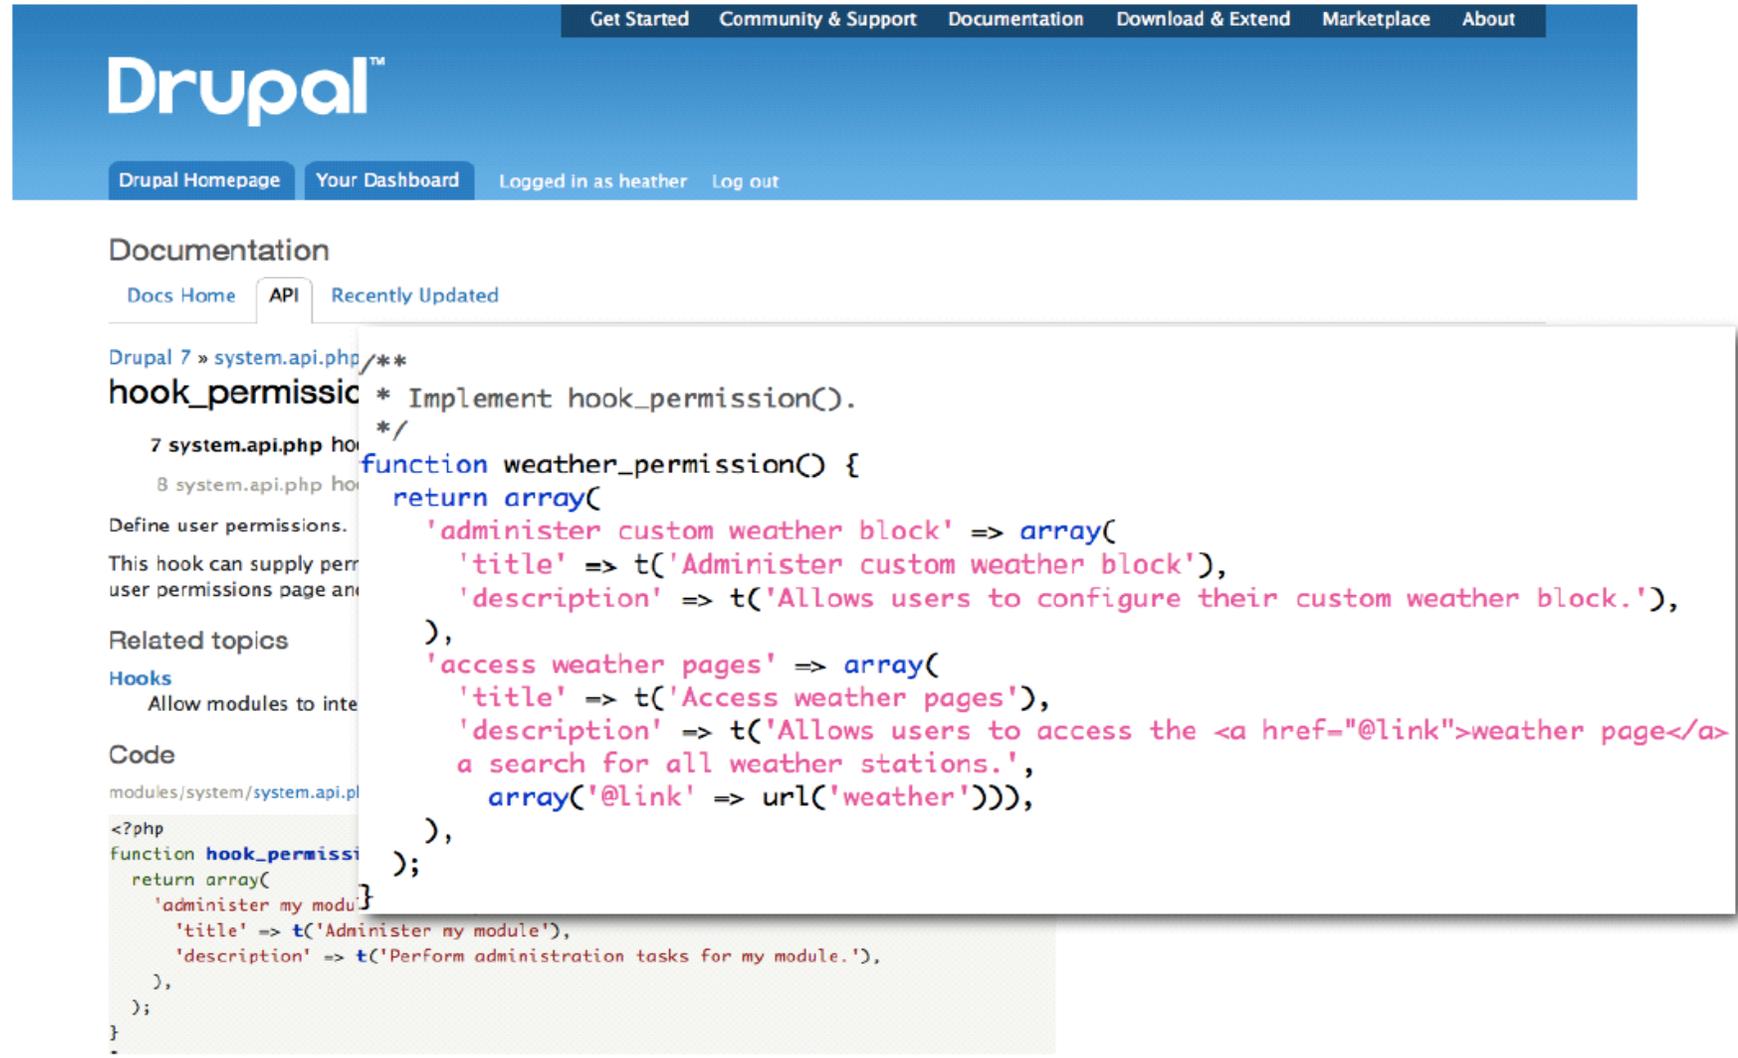

2. Compared to frameworks:

- Time/effort saved with sub-systems.
- Time/effort saves with distributions.

3. A large ecosystem of **service providers** and specialists.

4. Large and **active community**.

Extensible API

Drupal 7 » system.api.php/**
hook_permission() * Implement hook_permission().
*/
7 system.api.php hook_permission() function weather_permission() {
8 system.api.php hook_permission() return array(
Define user permissions. 'administer custom weather block' => array(
This hook can supply permissions. 'title' => t('Administer custom weather block'),
user permissions page and 'description' => t('Allows users to configure their custom weather block.'),
),
Related topics 'access weather pages' => array(
Hooks 'title' => t('Access weather pages'),
Allow modules to integrate 'description' => t('Allows users to access the weather page
a search for all weather stations.',
Code array('@link' => url('weather'))),
modules/system/system.api.php hook_permission() },
<?php hook_permission());
function hook_permission() return array(
'administer my module' => array(
'title' => t('Administer my module'),
'description' => t('Perform administration tasks for my module.'),
)
)
);
}

Customize client UX

The image displays two overlapping screenshots of the Drupal 7 user interface. The background screenshot shows the 'My Workbench' page, which includes a navigation menu at the top (My Workbench, Dashboard, Content, Structure, Appearance, People, Modules, Configuration, Reports, Help), a user profile section for 'siteadmin', and a table of 'All Recent Content'. The foreground screenshot shows the 'Administer' page, which features a sidebar menu with options like 'Create content', 'Devel', 'Administer', 'Content management', 'Site building', 'Site configuration', 'User management', 'Reports', and 'Help'. The main content area of the Administer page is organized into two columns: 'Content management' (with links for Comments, Content, Content types, and Forums) and 'Site building' (with links for Blocks, Menus, Modules, and Themes). A semi-transparent white box with the word 'Workbench' in a cursive font is overlaid on the bottom left of the Administer page.

Admin with Rubric theme

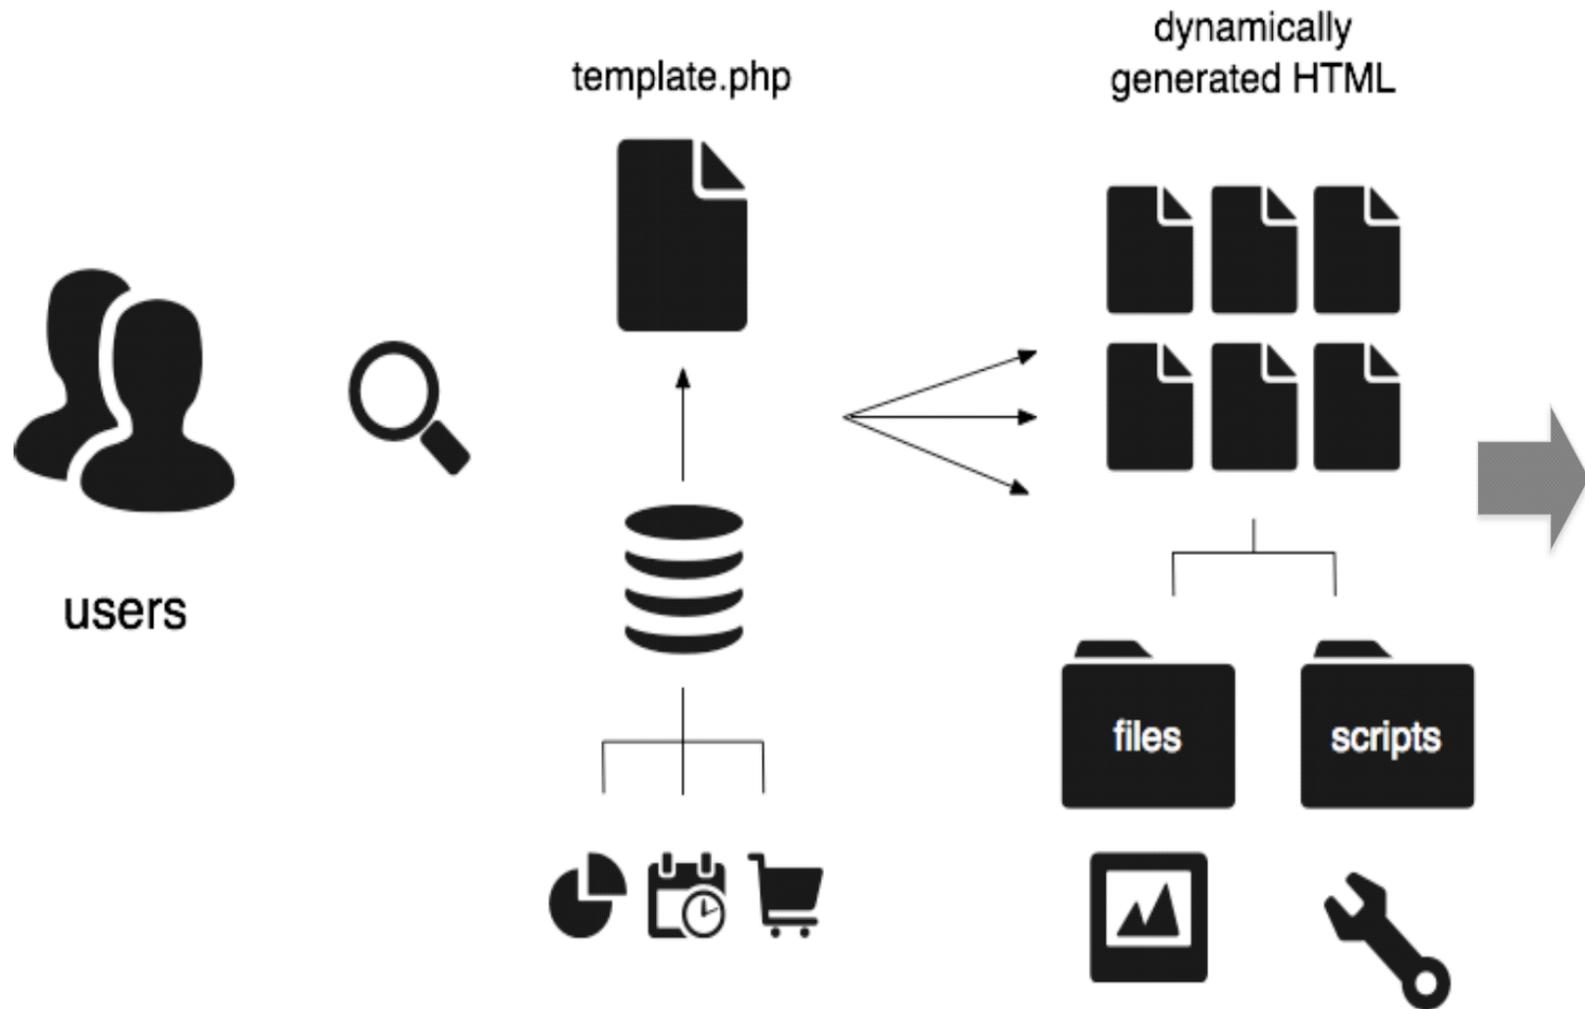

Distributions (packages)

Themes for appearance

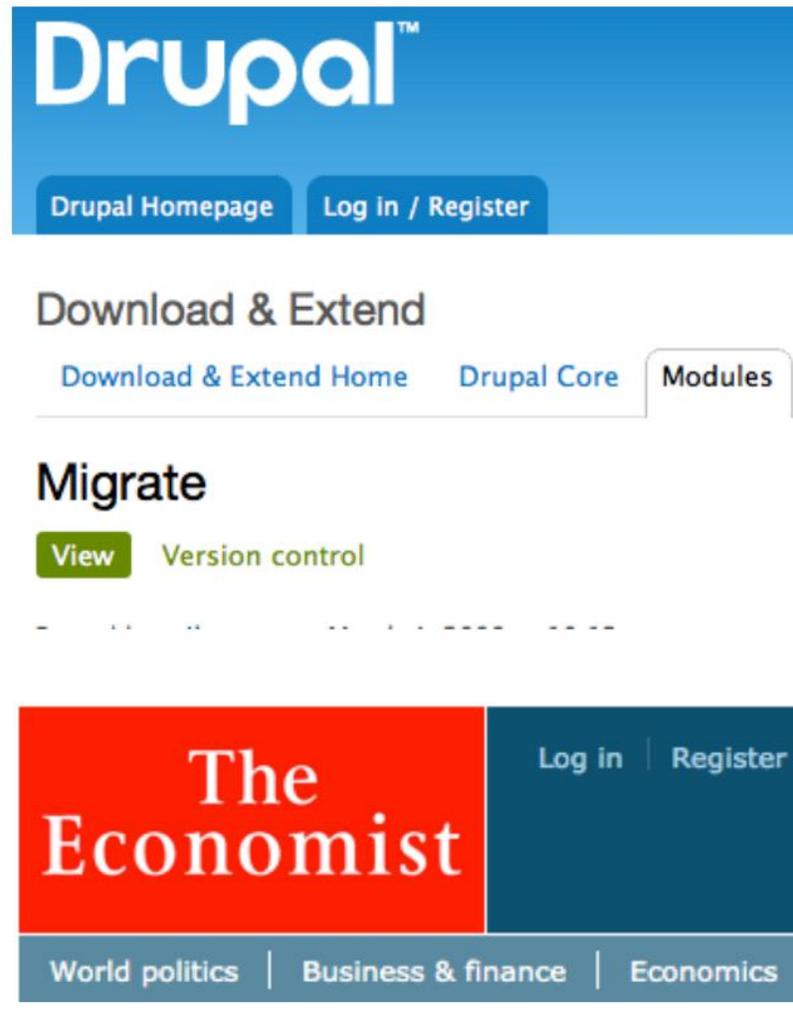

Database driven

Migration

- Migrate module
- Supports migration from other CMS's (WordPress, Typo3 etc.)
- Supports migration from older Drupal versions.

The screenshot displays the Drupal website interface. At the top, the 'Drupal' logo is prominent in white on a blue background. Below it, there are navigation links for 'Drupal Homepage' and 'Log in / Register'. The main content area features a section titled 'Download & Extend' with sub-links for 'Download & Extend Home', 'Drupal Core', and 'Modules'. A 'Migrate' section is highlighted, containing a 'View' button and a link to 'Version control'. Below this, there is a red banner for 'The Economist' with 'Log in' and 'Register' links, and a footer with navigation for 'World politics', 'Business & finance', and 'Economics'.

Blocks and menus

The screenshot shows the Open Source .com website interface. At the top, there is a navigation bar with links for 'About', 'Community', 'Participate', 'Contribute', 'Mailing list', 'The open source way', and 'Webcasts'. On the right side of this bar are 'Login', 'Sign Up', and a RSS icon. Below the navigation bar is a search bar with the text 'Search opensource.com'. The main header features the 'open source .com' logo and the tagline 'The open source story continues to grow', along with 'A Red Hat community service' logo. A main menu is located below the header, with categories: 'Open*', 'Business', 'Education', 'Government', 'Health', 'Law', and 'LIFE'. The main content area is divided into several blocks: 'Featured content' with three article teasers, 'AUGUST FAVORITES' with a list of links, 'OPEN SOURCE RESOURCES' with a list of links, a poll titled 'Do you think every major city and airport should have free wifi?', and a 'Contributor spotlight' for Peter Borsa. Blue arrows point from text labels on the right to these specific elements on the page.

Drupal.org/project/module

The screenshot shows the Drupal.org website interface. At the top, there is a blue header with the Drupal logo, a search bar, and navigation links for 'Drupal Homepage', 'Your Dashboard', 'Logged in as hodota', and 'Log out'. Below the header, the main content area is titled 'Download & Extend' and includes tabs for 'Download & Extend Home', 'Drupal Core', 'Distributions', 'Modules', and 'Themes'. A yellow warning banner is present, followed by a search filter section showing '16,010 Modules match your search' with various dropdown menus for maintenance status, development status, module categories, and core compatibility. Below the filters is a search bar and a 'Search' button. The main content area displays the details for the 'Services Government Format' module, including its description, a list of recommended releases, and a table of download links.

Services Government Format

Posted by [grasmash](#) on November 13, 2014 at 2:25pm

This module assists in making Services responses comply with the [White House API Standards](#).

- By default, it will modify all responses to include metadata in accordance with said standards
- It also supplies `services_govformat_format()`, which can be used by services resource callbacks to return data in a compliant format.

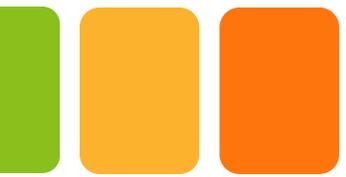

For example:

Downloads

Recommended releases

| Version | Download | Date | Links |
|----------------|---|-------------|--|
| 7.x-1.0-alpha1 | tar.gz (9.76 KB) ZIP (11.36 KB) | 2014-Nov-13 | Notes Edit |

Overriding a push system

The screenshot shows a Drupal website interface. At the top is a navigation menu with links: Dashboard, Content, Structure, Appearance, People, Modules, Configuration, Reports, Help. On the right, it says 'Hello heather' and 'Log out'. Below the menu is a logo of a stylized character. The main content area is titled 'All News' and includes a sub-header 'News when you want it'. There are sections for 'Main menu' and 'Secondary menu' with various links. A featured article is displayed with the title 'High fuel costs - Switching to push lawnmowers', submitted by 'heather' on March 1, 2012. The article text is a placeholder. To the right of the article is a quote: 'Any sufficiently advanced technology is indistinguishable from magic. - Arthur C. Clarke'. Below the article is a 'Headlines' section with two links: 'High fuel costs - Switching to push lawnmowers' and 'New highspeed rail to...'. At the bottom left, there is a 'Topics' section with a list of categories: Culture, International, Local, Politics, Regional, Sports, and Weather.

User profile output

The image shows a screenshot of a Drupal user profile page for a user named 'siteadmin'. The page has a header with the name 'siteadmin' and three tabs: 'View', 'Edit', and 'Shortcuts'. Below the tabs is a blue-bordered box containing the profile information: 'History' (with a silhouette icon), 'Member for 2 weeks 4 days', and a 'user-picture' placeholder. Below the page content, a browser's developer tools are open, showing the DOM tree and the CSS styles for the selected element.

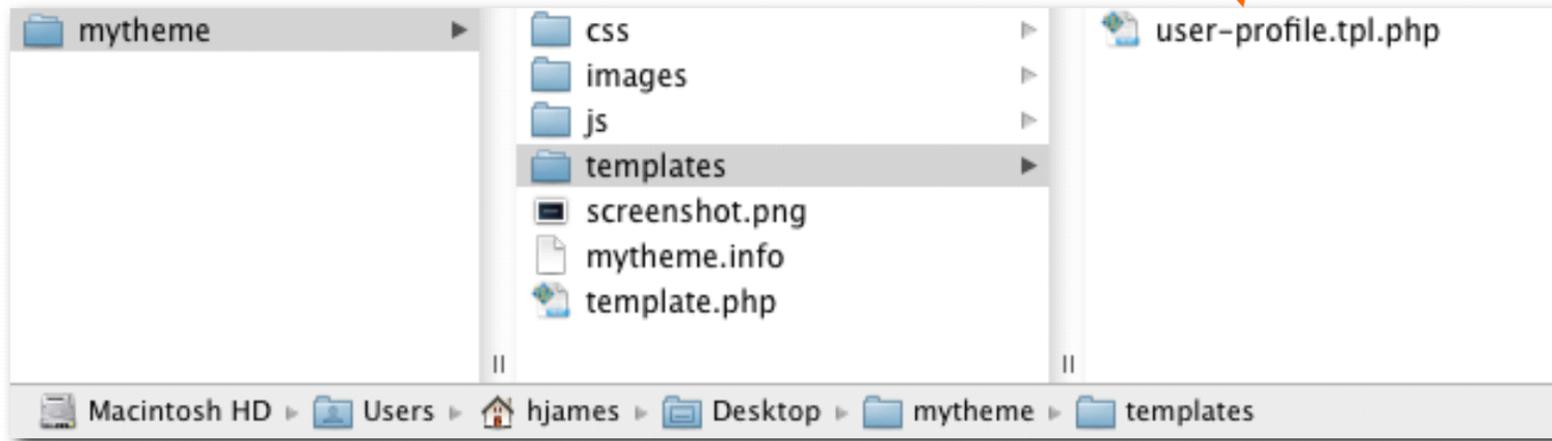

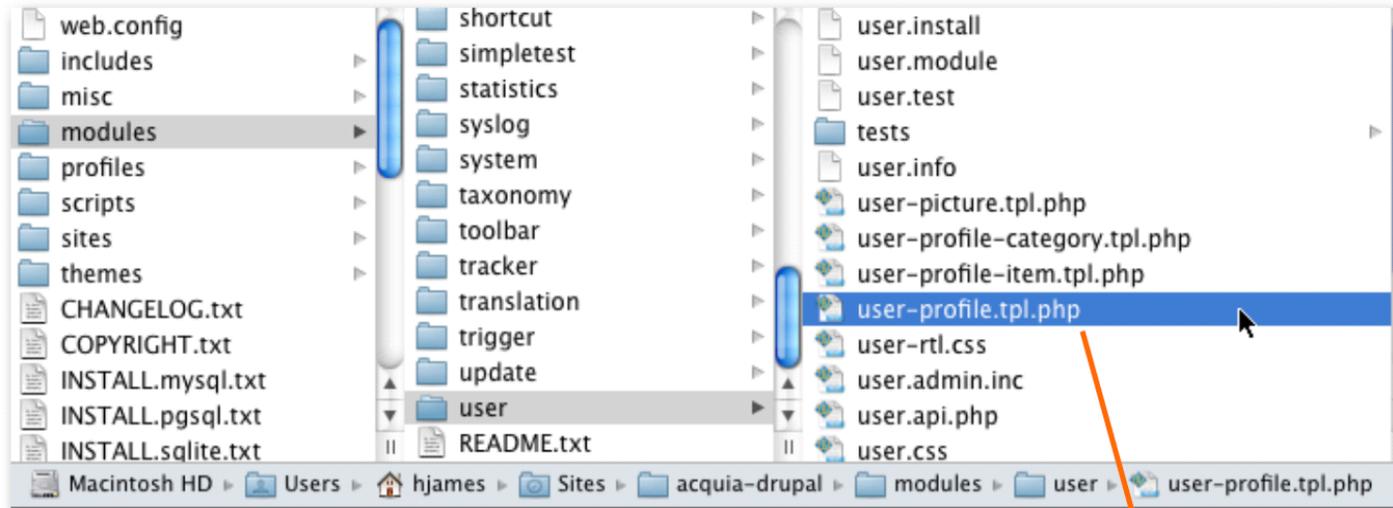

DOM Tree:

```
<div class="tabs">
  <div class="region region-content">
    <div id="block-system-main" class="block block-system">
      <div class="content">
        <div class="profile" about="/users/siteadmin" typeof="sioc:UserAccount">
          <div class="user-picture">
            <h3>History</h3>
            <dl>
              <li>Member for 2 weeks 4 days</li>
            </dl>
          </div>
        </div>
      </div>
    </div>
  </div>
</div>
```

Style Panel:

```
.block styles.css?luoazn (line 113)
.content {
  padding: 10px;
}
Inherited from div#page.container_16
#page {
  border-style: none solid solid;
}
Inherited from body.html
body {
  color: #3F3F3F;
  font-family: arial,sans-serif;
  font-size: 14px;
  line-height: 135%;
}
```

COPY to your theme

Modify markup

```
<h1>HELLO THERE!!</h1>
```

```
<div class="profile"<?php print $attributes; ?>>  
  <?php print render($user_profile); ?>  
</div>
```

Voila!

- Drupal first sees your theme's **user-profile.tpl.php** and renders it instead of the core **user-profile.tpl.php**

siteadmin

Naming patterns

based on core	template pattern	custom template
node.tpl.php	node-- nodeid .tpl.php	node-- 15 .tpl.php
block.tpl.php	block-- region-delta .tpl.php	block-- sidebar-first .tpl.php

node--[type|nodeid].tpl.php

base template: *node.tpl.php*

Template suggestions are made based on these factors, listed from the most specific template to the least. Drupal will use the most specific template it finds:

1. node--nodeid.tpl.php
2. node--type.tpl.php
3. node.tpl.php

See [node.tpl.php](#) in the Drupal API documentation for more information.

Docs: <http://drupal.org/node/1089656>

Use machine names

based on core	template pattern	custom template
node.tpl.php	node-- type .tpl.php	node-- article .tpl.php

Content types 

[+ Add content type](#)

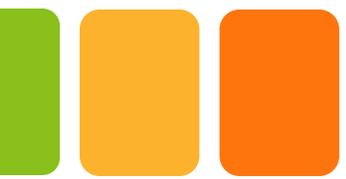

NAME	OPERATIONS
Article (Machine name: article) Use <i>articles</i> for time-sensitive content like news, press releases or blog posts.	edit manage fields manage display delete

テーマの特徴

- SQL言語でテーマのページをプログラミングする必要はありません。テーマモジュールを作るだけです。
- コンテンツの最適な管理方法として、例えばサーバの上でサイズ変更をしてページに表示させます。CSSで変更するのではなく。
- Drupalでのサイトデザインを表示させる方法としてStyle Guideモジュールを使うと便利です。

モジュールのダウンロード <https://www.drupal.org/project/styleguide>
デモサイト <http://styleguide.allgoo.de/>

カスタムモジュール

Making a module

- Configure first and override.
- Reduce duplicate effort!
- Custom “glue” for sites.
- Skills required:

HTML

What can you do?

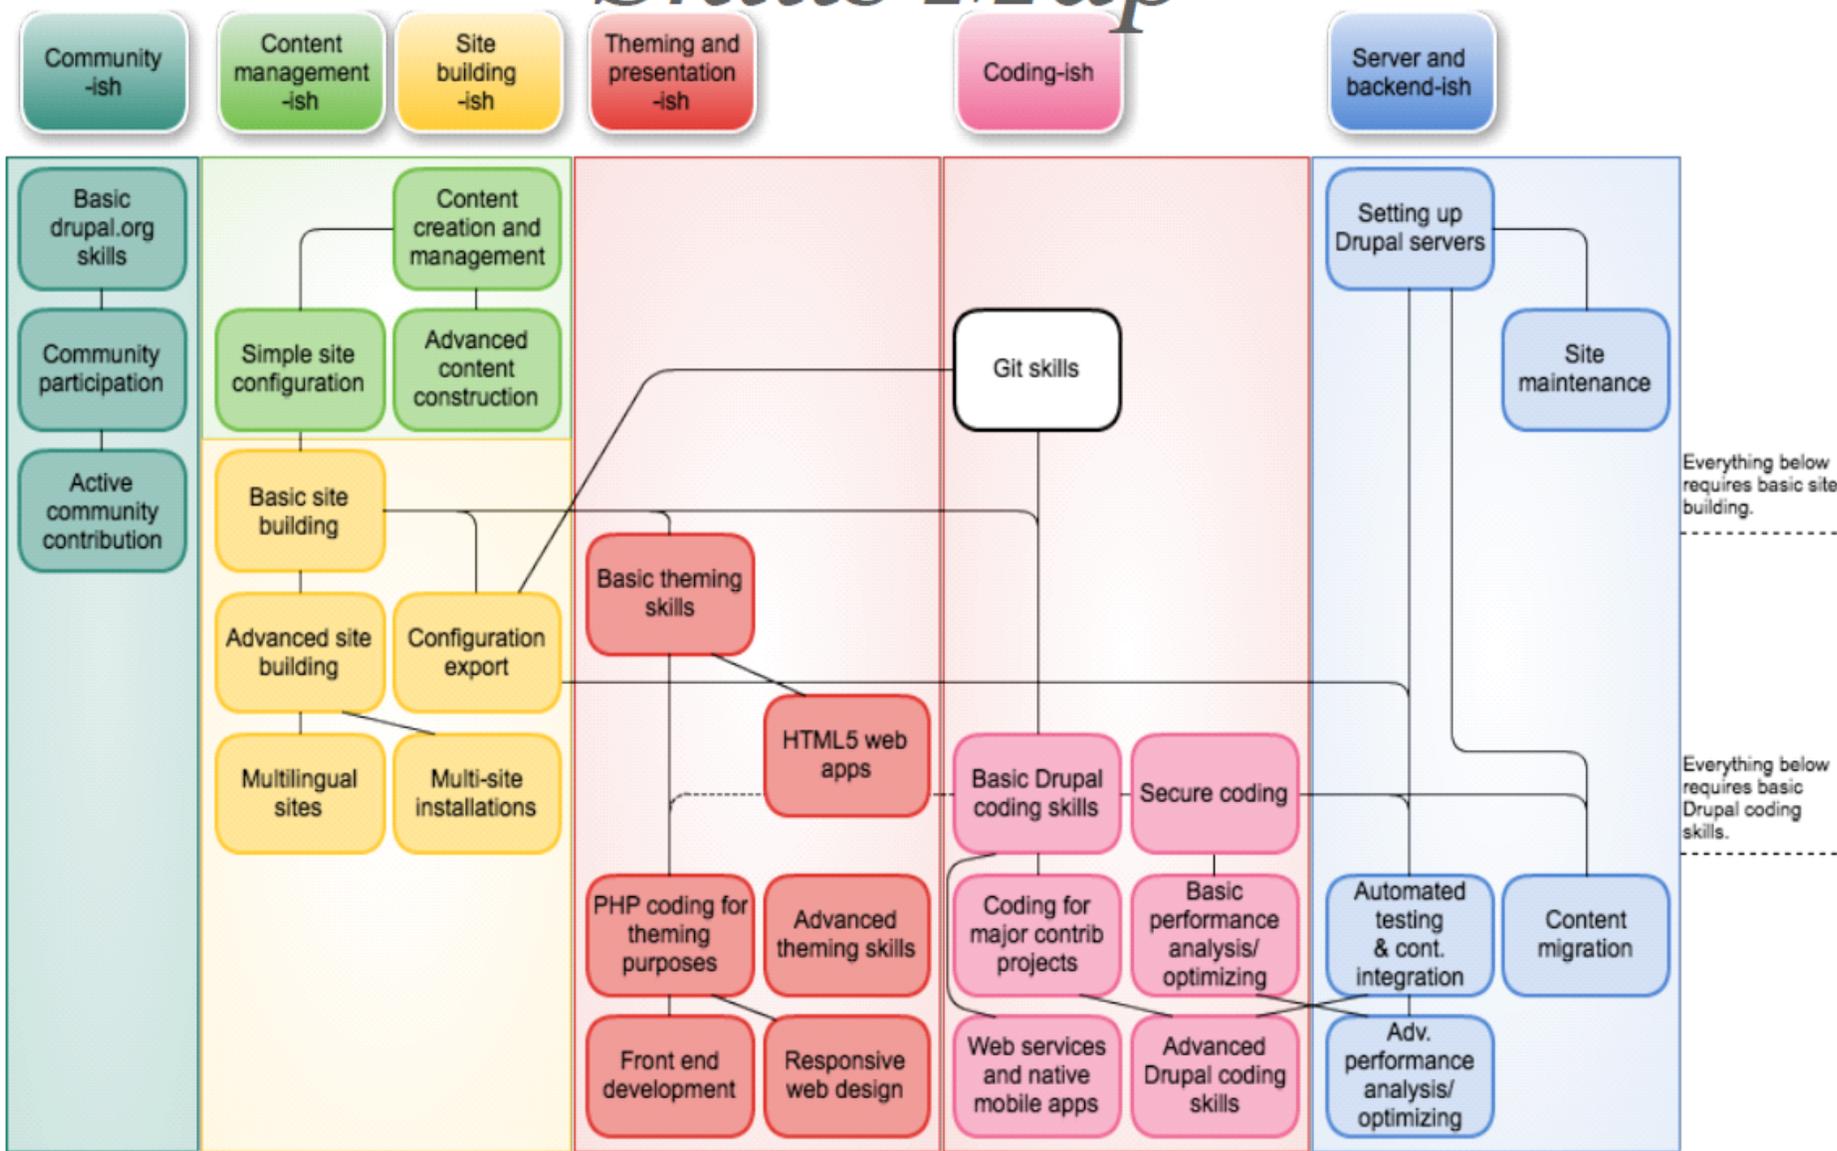

- Use or create hooks- a simple callback function called on specific events.
- Check access control.
- Access data, from within Drupal or other datasource.
- Insert, update and delete data.
- Generate blocks.
- Display results, or expose data to Views.
- Theme how results or outcomes appear.

- <https://prague2013.drupal.org/keynote/dries-buytaert>

The screenshot shows the DrupalCon Prague 2013 website. At the top, there is a navigation bar with links for HOME, CONFERENCE, SPEAKERS, PRAGUE, COMMUNITY, and SPONSORS. The event dates are 23-27 SEPT 2013. The main content area features a video player for Dries Buytaert's keynote, titled "DRIES BUYTAERT". Below the video player is a circular profile picture of Dries Buytaert and the text "DRIES BUYTAERT, DRUPAL PROJECT FOUNDER". To the right of the video player, there is a "TICKETS & REGISTRATION" section with "IMPORTANT DATES" for September 23-27, listing various events and keynote speakers.

Configuration Management 構成管理

- サイト機能をバックアップ
- モジュールや機能別に
- サイト移行、複製に便利

The screenshot shows the 'Single export' interface in Drupal. It features three tabs: 'Synchronize', 'Single Import/Export', and 'Full Import/Export'. Below the tabs, there are links for 'インポート' (Import) and 'エクスポート' (Export). A breadcrumb trail reads 'ホーム > 管理 > 環境設定 > 開発 > Synchronize'. The 'Configuration type' is set to 'Simple configuration'. The 'Configuration name' is 'locale.settings'. A text area displays the following configuration:

```
cache_strings: true
translate_english: false
javascript:
  directory: languages
translation:
  use_source: remote_and_local
  default_filename: '%project-%version.%language.po'
  default_server_pattern: 'http://ftp.drupal.org/files/translations/%core/%project/%project-%version.%language.po'
  overwrite_customized: false
  overwrite_not_customized: true
  update_interval_days: 0
  path: sites/default/files/translations
  import_enabled: true
```

At the bottom, it states: 'The filename is locale.settings.yml.'

Block layout Custom block library

Bartik Seven

ホーム » 管理 » サイト構築

This page provides a drag-and-drop interface for adding a block to a region, and for controlling the order of blocks within regions. To add a block to a region, or to configure its specific title and visibility settings, click the block title under *Place blocks*. Since not all themes implement the same regions, or display regions in the same way, blocks are positioned on a per-theme basis. Remember that your changes will not be saved until you click the *Save blocks* button at the bottom of the page.

Content language ☆

[ホーム](#) » [管理](#) » [環境設定](#) » [地域と言語](#)

Before you can translate content, there must be at least two languages added on the [languages administration](#) page. Change language settings for *content types*, *taxonomy vocabularies*, *user profiles*, or any other supported element on your site. By default, language settings hide the language selector and the language is the site's default language.

Acquia DevDesktop 2で Drupal 8 ハンズオン

Acquia DevDesktopのインストール

Beta版のダウンロード : <https://www.acquia.com/downloads>

英文のマニュアル <https://docs.acquia.com/dev-desktop2>

Acquia Dev Desktop 2

Acquia Dev Desktop 2 allows you to install, test, and build Drupal sites locally on your Mac or Windows PC and optionally host them on either [Acquia Cloud](#) or the [Acquia Cloud Free](#) developer sandbox. Easily push or pull to synchronize your local site's code, database, or files with any Acquia Cloud environment.
